

**MODERN ALGEBRA (MC-207)**  
**2024 (ODD SEMESTER ) B.Tech III <sup>rd</sup> SEMESTER**  
**PRACTISE ASSIGNMENT**

**Q1** A non-empty subset  $H$  of a finite group  $G$  is a subgroup of  $G$  if and only if  
 $ab \in H$  whenever  $a, b \in H$

**Q2** Prove that every subgroup of an abelian group is normal.

**Q3** Let  $G$  be a group and  $H \leq G$ . Prove that the order of a subgroup  
divides the order of the group.

**Q4** Consider the group  $G = \mathbb{Z}_{12}$ , identify all the subgroups of this  
group. Are they all normal?

**Q5** A subgroup  $H$  of a group  $G$  is normal if and only if left coset of  
 $H$  in  $G$  is a right coset of  $H$  in  $G$ .

**Q6** Give an example of a group  $G$  having a subgroup  $H$  and two  
elements  $a, b$  in  $G$  such that  $Ha = Hb$  but  $aH$  not equal to  $bH$ .

**Q7** Show by an example that abelian groups may not be cyclic.

**Q8** Show that the set  $S$  of all  $2 \times 2$  non-singular matrices over  $\mathbb{R}$  is a  
Group under matrix multiplication.
